Projects

PokeAPI, Web Application built using React that is a easy to use Pokedex for who need quick and easy access to information about any pokemon. This application uses the PokeAPI to fetch data and display it in a clean and concise format for Desktop and Mobile viewers.

Fetch App, Simple application using the React framework to sort through a list of dogs grabbed from an API call based on a variety of filters and choose which ones you would like to adopt.

Zip App, App developed during my Senior Project class. The app is similar to Uber where users order a cart to pick them up around a campus for easier traveling during a gameday. The app has Android and Ios supports built using flutter and dart.
