PROFESSIONAL SUMMARY

I am a full-stack developer specializing in React, Laravel, and WordPress. Currently building and maintaining custom agency websites and web applications, working with different technologies such as Kadence, Sage, and Laravel. Comfortable shipping on client deadlines alongside designers and project managers.

EXPERIENCE

Junior Developer *Nov 2025 - Present*

[Kinetic Communications](#) | Birmingham, AL

- Build and maintain custom WordPress themes and full-stack applications for agency clients using Laravel, React, and PHP.
- Develop Sage-based WordPress themes with Blade templating and modern front-end build tooling.
- Diagnose and resolve production issues on live client sites, including security scanner failures and hosting and CDN configuration on managed WordPress hosts.
- Work directly with designers and project managers in an agile workflow, using Git to ship features on deadline.

Developer Intern *Aug 2025 - Nov 2025*

[Kinetic Communications](#) | Birmingham, AL

- Contributed front-end and theme work to client WordPress sites built with Kadence blocks.
- Learned the team's Git and agile workflow and began taking on feature work independently.

Co-op Software Engineer *Aug 2019 - May 2021*

[UDA Technologies](#) | Auburn, AL

- Built new pages and UI components in HTML, CSS, and JavaScript from design specs.
- Investigated and fixed client-reported bugs in a cloud-based construction management platform.
- Developed responsive mobile web interfaces to improve usability across devices.

EDUCATION

Bachelor of Software Engineering *Aug 2017 - May 2022*

[Auburn University](#) | Auburn, AL

Relevant Coursework: Software Modeling & Design, Software Quality Assurance, Introduction to Algorithms, Software Process

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, HTML, CSS

Frameworks & Tools: React, Next.js, Laravel, WordPress, Sage, Blade, Git

Databases: MySQL, SQLite, Postgres, REST APIs

PROJECTS

PokeQuiz - Full-stack Pokémon quiz app where players identify Pokémon in a hangman-style game with hints that reveal stats, typing, generation, and silhouette. Built with a Laravel REST API backend and a React frontend.

[pokequiz-brown.vercel.app](#)

Homebar - Cocktail recipe browser and home bar inventory manager. The cocktail list is decided by what the user has in their bar. Built with Next.js, TypeScript, and Drizzle ORM, seeding data from TheCocktailDB. [homebar.xyz](#)

Disc Golf Tracker - Full-stack disc golf scoring app with multiplayer rounds, course management, a disc bag, leaderboards, and player stats. Built with a Laravel 12 REST API and a React frontend. [disc-golf-app-flame.vercel.app](#)
